

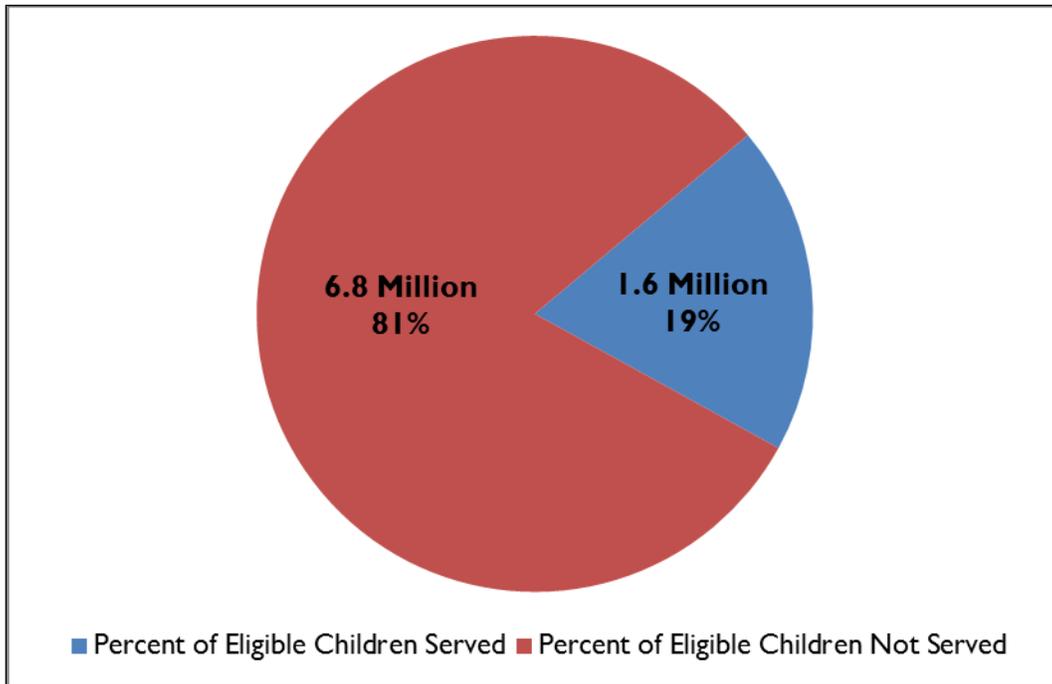

Figure 9-5. Percent of Children Eligible Under State Rules Who Were Served by the CCDF in FY2011

Source: Figure prepared by the Congressional Research Service on September 8, 2014, for the 2014 version of the House Ways and Means Committee Green Book. CRS estimates were developed based on data from the Urban Institute Transfer Income Model (TRIM) and the U.S. Department of Health and Human Services (HHS). Estimates of average monthly participation are based on HHS administrative data for FY2011, available at <http://www.acf.hhs.gov/programs/occ/resource/ccdf-statistics>. TRIM estimates of eligibility were based on Current Population Survey (CPS) data from 2011 and state-specific eligibility rules.

Notes: The CPS does not include data from U.S. territories; as a result, CRS excluded children participating in territories from average monthly HHS participation estimates.
