Notes: TAA-certified workers must exhaust unemployment insurance benefits before accessing Trade Readjustment Allowance (TRA) benefits. Certain years' TRA participation and outlay data may be influenced by extended unemployment insurance benefits that were available during those years.

- a. In response to the increases in TRA participation and program costs in 1980 and 1981, the Omnibus Budget Reconciliation Act of 1981 made several changes to eligibility requirements and benefit calculations with the stated objective of reducing program costs. These changes became effective October 1, 1981.
- b. Average weekly TRA benefit levels were not available for FY2011 or FY2012.
